EXPERIENCE

MURATA ELECTRONICS SINGAPORE *HR Data Analytics Intern* May 2026 - Aug 2026

- Built an automated employee development and coaching system for 2,000+ employees using Microsoft Forms, Power Automate, SharePoint, and Power Apps to streamline activity submissions, supervisor approvals, learning records, and progress monitoring.
- Consolidated HR and manpower data from multiple sources to develop 2 new Power BI dashboard pages and enhance 8 existing pages, supporting analysis of headcount planning, workforce demographics, turnover, attendance, and engagement.
- Developed a Python-based attendance analytics pipeline to consolidate 131 leave files and 86,000+ records, integrate employee shift calendars, validate data quality, and calculate monthly attendance ratios for Power BI reporting.
- Cleaned, restructured, and standardised HR and employee survey data using Python, producing analysis-ready datasets for Power BI dashboards and statistical analysis.

SPH MEDIA *B2B Marketing Analytics Intern* May 2025 - Aug 2025

- Transformed 58K+ corporate subscription records into actionable insights with RStudio and Tableau, enabling marketing team to optimise discount pricing for publications based on purchasing trends
- Structured sales data for 300+ schools using customer tiering to support sales forecasting and campaign targeting for Student Publications cycle

NUS COMPUTING *BT2102 Data Management and Visualisation Teaching Assistant* Aug 2025 - Apr 2026

- Guided students in mastering data analytics fundamentals by evaluating SQL examination scripts and database schema assignments for accuracy and functionality, while providing detailed, constructive feedback.
- Assessed final data visualisation projects to ensure analytical depth and clarity, helping students develop industry-relevant storytelling skills

TÜV SÜD *Global Marketing Intern* Jan 2026 - Apr 2026

- Analysed post-event performance across global industry events using metrics such as lead generation, conversion rates, and engagement to evaluate ROI and identify optimisation opportunities
- Conducted data-driven research on potential future events by reviewing historical attendance trends and strategic indicators to assess alignment with business objectives
